Xerox WorkCentre® 7655/7665 Version 2.0 Extend Your Investment

Maximizing the value and life of your Xerox WorkCentre 7655/7665 color multifunction printer is a critical part of protecting your investment. This could mean adding a new finishing module to support new work processes, upgrading security features to protect your confidential documents or adding new features. Xerox has delivered a wide range of new and enhanced features that are now available for your WorkCentre 7655/7665.

Highlights include new scan and fax features like mailboxes and LAN fax, security enhancements like support for Xerox Secure Access, support for integrated applications with Xerox Extensible Interface Platform (EIP) and more. The upgrade process is simple: A Xerox customer service engineer handles everything on-site, and there's nothing for you to install. Maximizing the value of your Xerox products makes business sense.

Find out more about how you can grow with Xerox by contacting your Xerox representative today at 1-800-ASK-XEROX.

The WorkCentre 7655/7665 upgrade option offers new and enhanced features in almost every area of operation:

Security:

- **Xerox Secure Access** (*optional*) — enables smart card-based device authentication for fast, simple user access to the WorkCentre 7655/7665
- **Auto Schedule On-Demand Image Overwrite** — schedules image overwrite of hard drive to “electronically shred” stored documents and data
- **802.1x Support** — ensures connected devices have proper authentication
- **IP Filtering** — prevents unauthorized network access based on IP address and/or port number
- **LDAP Authentication/Secure LDAP** — configure LDAP requests so that only people with user IDs can be authenticated by the LDAP server
- **Hide Print Job Name in Queue** — hides/obscures document names in the queue via front panel to keep confidential jobs safe
- **Hard Drive Encryption** — encrypts print, scan and email jobs saved to and read from the MFP hard drive, helping to protect sensitive data

IT Management:

- **Automatic Information Forwarding** — automates collecting and sending reports to Xerox for better service and more accurate billing
- **IPv6 Support** — manage and print to devices using SNMP over networks utilizing IPv6
- **Support for Active Directory** — fully integrate the WorkCentre 7655/7665 into your Microsoft® Active Directory infrastructure
- **Support Large Number of Domains** — supports a large network of users by operating across more than 50 network domains

Print Features:

- **Capture, Print, Store, Reprint** — stores print jobs at the MFP for convenient reprinting from the front panel, particularly useful for managing forms
- **Windows Vista Print Drivers** — PostScript® and PCL® drivers for Microsoft Windows® Vista

- **Mac Driver Fit to Size** — adds driver feature for helping format booklets for Apple Mac OS® environments
- **Unicode Printing Support** (*optional*) — supports Unicode print streams, which allows text and symbols to be consistently re-created by the WorkCentre 7655/7665
- **PCL Forms Downloading** — stores PCL Forms/Font “packages” on MFP hard disk so they are not lost when MFP is rebooted

Copy Features:

- **Color Annotation and Bates Stamping** — add comments, codes, page numbers, and/or dates to copied documents — particularly helpful in legal and health-care environments

Scan Features:

- **Scan to Home** — scan images directly to a personal directory or network location using authenticated users’ credentials
- **Scan to Mailbox** — scans to MFP hard drive for retrieval via web browser
- **Scan to Searchable PDF and XPS Formats** — creates text-searchable PDF or XPS documents
- **Support for Email Attachment Name** — manually sets naming conventions for documents scanned to email

Fax Features:

- **LAN Fax** — allows electronic files to be transmitted directly from the PC via print driver

Extensibility:

- **Extensible Integrated Platform (EIP)** — customize capabilities of your WorkCentre 7655/7665 with EIP, which enables a variety of applications to run on your MFP that securely find, save, print and share critical information with just a few easy steps, right on the MFP front-panel touch screen

Finishing Options:

- **Light Production Finisher with Folder Option** — adds support for new finishing options with 100-page stapling, booklet making, post process inserting, and optional C- and Z-folding
